

Go Green

Go Green with Eaton Molded Case Circuit Breakers

Going green — using natural resources and energy wisely — means more than just being environmentally responsible. It's good business, too!

Circuit breakers save energy as compared to fuses because they have less watts loss for like ratings. And, circuit breakers can be reset after they trip, while fuses must be replaced and discarded in compliance with special disposal procedures.

Make the environmentally sound choice — switch to Eaton Molded Case Circuit Breakers.
